ola@ola:~$ 
```

- Source IP associated with the event.

The screenshot shows a terminal window titled "ubuntu on DESKTOP-CNV4E20 - Virtual Machine Connection". The terminal output displays the command `ola@ola:~$ ~/ssh_alart.sh` and its results. The output is a list of SSH security events, including failed password attempts and invalid user logins, all originating from the IP address 192.168.10.101. The events are timestamped and include details about the user, command, and session. The terminal also shows the command `ola@ola:~$` at the bottom.

```
ola@ola:~$ ~/ssh_alart.sh
